MIT Press Ltd, United States, 2006. Hardback. Book Condition: New. 231 x 155 mm. Language: English . Brand New Book. Financial crises and failed transition experiments have highlighted the fact that functioning institutions are fundamental to the goal of achieving economic growth. Concepts covered include appropriate institutions (the idea that different institutional arrangements are appropriate at different stages of economic development); liberalized credit markets; the influence of institutions on productivity; institutional and regulatory reforms in the OECD; how innovation and entrepreneurship influence growth (including an analysis of patent activity in the United States from 1790 to 1930); the endogeneity of institutions as seen in the recruitment of elites by higher education institutions; the effect of economic development on transitions to democracy; and technology adoption in agriculture.Contributors:Philippe Aghion, Costas Azariadis, Elise S.
